In aid of New Sight Eye Care

If you are able to donate through Gift Aid please let me know!

The Republic of Congo has never had any eye centre with surgical service in the whole country. Responding to the desperate need, Joyce and Henri Samoutou, along with their three young children, are moving from Leeds to pioneer the first and only eye centre with surgery in the whole country! They estimate that they can help four in five people who are blind and visually impaired to see again. Many of this will be through a simple operation costing as little as £50. Let us get behind them and raise the £100 000 that they need in the first year to set up this amazing centre that will literally transform thousands of lives!
